The future of research data management

PhaidraCon2020

THE VIENNA SESSIONS

How to predict the future?

We overestimate what can be achieved in a year,
but we underestimate what you can achieve in ten.

What are the drivers of today?

FAIR data principles
AI, BigData, HPC
Symantic Web

Tocotronic – Digital ist Besser
Release: 1995

Machine-actionable

Integration

Standards

What will/should be in the future

- Data will move without any barrier from process to archive and back to process
- Research data management is an integrated part of research
- Researcher get known by their data

What do you think about the future?
