Messrs. George G. Harrap a. Co. Ltd.
182 High Holborn, London WC 1.

Dear Mr. White,

Power Production

Thank you for your letters of May 2, 8, 11, and 17 and for the rest of the proofs. I mailed sheets No. H, I, K, L, M on May 18. Sheets N - X together with the corresponding batch of galleys will be sent to you under separate cover today. The typescript of the index will be mailed on Friday together with the rest of the page proofs.

I am enclosing letters of Dr. Maria Telkes and of the Shell Company. Both were covering letters to a dispatch of illustrations which they sent me upon my request to have them for reproduction in my book. There is only Fig. 25 taken from UNESCO publications.

The figures for Outlet H .P. Compressor, Table 8 (p. 110) will follow tomorrow. The figures on page 304 are all right now. Following the suggestion of your letter of April 10 a series of passages on Russian hydro-plants has been replaced by a new text which you promised to insert in the page proofs. I suppose that this will have been done on pages 248 to 250. Please send me as soon as possible a copy of the revised sheet Q so that I can check the page numbers of the newly inserted Russian plants Krasnoyarsk, Bratsk etc. for the subject index.

As regards sub-title: My original idea was that
POWER PRODUCTION, PRESENT AND FUTURE

without any sub-title. If you prefer, however, the main title Power Production plus an alternative to the two letters of May 2 and 8 might be: Energy Resources of the World's Energy Resources. Or somewhat after Hall. I leave the decision to you.

The galleys with the page proofs I found have been omitted in the sheets I sent you a note regarding this matter. It may be corrected in the copies of sheets in your hands now.

Yours faithfully,
from me still this week.

Sincerely yours

Dear Mr. White,

Power Production

Thank you for your letters of May 2, 8, 11, and 17 and for the rest of the proofs. I mailed sheets No. H, I, K, L, M on May 18. Sheets N - X together with the corresponding batch of galleys will be sent to you under separate cover today. The typescript of the index will be mailed on Friday together with the rest of the page proofs.

I am enclosing letters of Dr. Maria Telkes and of the Shell Company. Both were covering letters to a dispatch of illustrations which they sent me upon my request to have them for reproduction in my book. There is only Fig. 25 taken from UNESCO publications.

The figures for Outlet H .P. Compressor, Table 8 (p. 110) will follow tomorrow. The figures on page 304 are all right now. Following the suggestion of your letter of April 10 a series of passages on Russian hydro-plants has been replaced by a new text which you promised to insert in the page proofs. I suppose that this will have been done on pages 248 to 250. Please send me as soon as possible a copy of the revised sheet Q so that I can check the page numbers of the newly inserted Russian plants Krasnoyarsk, Bratsk etc. for the subject index.

As regards sub-title: My original idea was that
POWER PRODUCTION, PRESENT AND FUTURE
should be the title without any sub-title. If you prefer, however, to split it into the short main title Power Production plus an explanatory sub-title I do not object. An alternative to the two wordings suggested in your letters of May 2 and 8 might be: Old and New Ways of Using the World's Energy Resources. Or somewhat shorter: From Watt to Calder Hall. I leave the decision to you.

In comparing the galleys with the page proofs I found that corrections might have been omitted in the sheets I sent you last week. I am enclosing a note regarding this matter. It may be that all has been properly corrected in the copies of sheets H and K which are in your hands now.

You will hear from me still this week.

Sincerely yours
