Professor Hans Thirring,
Jochbergerstr. 30,
Kitzbühel,
Tirol,
Austria.

Dear Professor Thirring,

Power Production

Thank you for your letter of July 27. I must apologise in my turn. The letter came in just before the Bank Holiday, and since then there has been rather a pressure of work.

I see the point about the use of the word "classified".

We cannot amend the index, of course, until we have a page proof of the new matter. A proof of the text is out with the Indiana University Press, and I am expecting it back shortly. The bibliography was included in the proof. Would you like me to send the proof of this part back again?

We are wondering whether certain passages (not so far included among the corrections) would not require to be altered on the grounds of out-of-dateness. Passages we have in mind are those at the foot of p.248, the foot of p.346, and the tablet on p. 349. There may be others. Perhaps you would let me know about this?

Yours sincerely,

GEORGE G. HARRAP & CO., LTD.

Power Production

Correction to p. 346: Lines 5 and 4 from bottom ~~NE~~ to be changed into:

was built at Calder Hall, Cumberland, at a cost of 16.5 million pounds contains an initial charge of fabricated uranium
