Q1.1

Project: COST Action 21114

Your use of technology at home in your CLIL language and how it helps your learning.

Funded by COST (European Cooperation in Science and Technology)

Q1.2 Informed Consent and Assent

What is this research about?

We would like to know what digital technologies and devices you use at home (i.e. online gaming, social media, streaming, etc.) and how they help you to learn subject-specific language and gain skills in things you're interested in (e.g. arts, health, history). We want to find out more about how these digital activities help when done in another language other than the main language of your school, so, for example, learning history in German when your school is in France.

If you'd like to know more about the research and your rights, then please download the information sheet from [here](#).

INFORMATION SHEET:

We're also interested in finding out what **you** (a student from Europe aged 9 to 21) think about **using digital tools and resources** in the CLIL classroom, how you **develop digital skills** and whether you think that the **use of technology outside of school** (i.e. playing consoles, online gaming, social media use) helps to support your learning.

Who is doing this research?

We are a group of **researchers** from across **Europe** who are involved in a **COST Action (No. 21114)**. COST is a European organisation that helps researchers, teachers, and others from across Europe to come together to investigate key topics in areas such as education.

Why is this research being done?

We're doing this research to see **how students from across Europe use digital tools and resources in CLIL languages and why**. We are also interested in finding out to what extent these digital practices allow and support **language** and **subject learning** in school.

How will this research help me?

By understanding the link between your use of technology at home and your language and subject learning at school, we hope that we'll be able to show teachers how they can use this to help

you **improve your language and subject learning** in school.

What do I have to do?

We are asking you to take part in the **online survey** which follows. The survey should take you between **25-30 minutes** to complete.

Do I have to take part?

The data obtained via the survey will be **anonymous**. If you do not wish to take part in the survey, you can close this internet window at any point. However, because the survey is anonymous, we will not be able to find any data that you have entered and delete it.

How will the information I give in the survey be used?

The information that you give us in this survey will help us to train teachers better in how your use of technology outside of school can **help your learning in school**. It will also help us to inform publishers to produce **better school materials**. It might also help us to influence what you learn, how you learn and why you learn certain things in school.

Will people know that it was me who gave the information?

Any personal data that you provide will not be traced back to you. All **data** will be **stored securely** during the analysis stage in the Qualtrics survey platform. Once we have explored what all students across Europe have said, we will write about it and may publish our findings so that other researchers and teachers can read about it.

Contact details:
