

# PHAIDRA

## AN OPEN APPROACH FOR THE REPOSITORY INFRASTRUCTURE FROM THE UNIVERSITY OF VIENNA

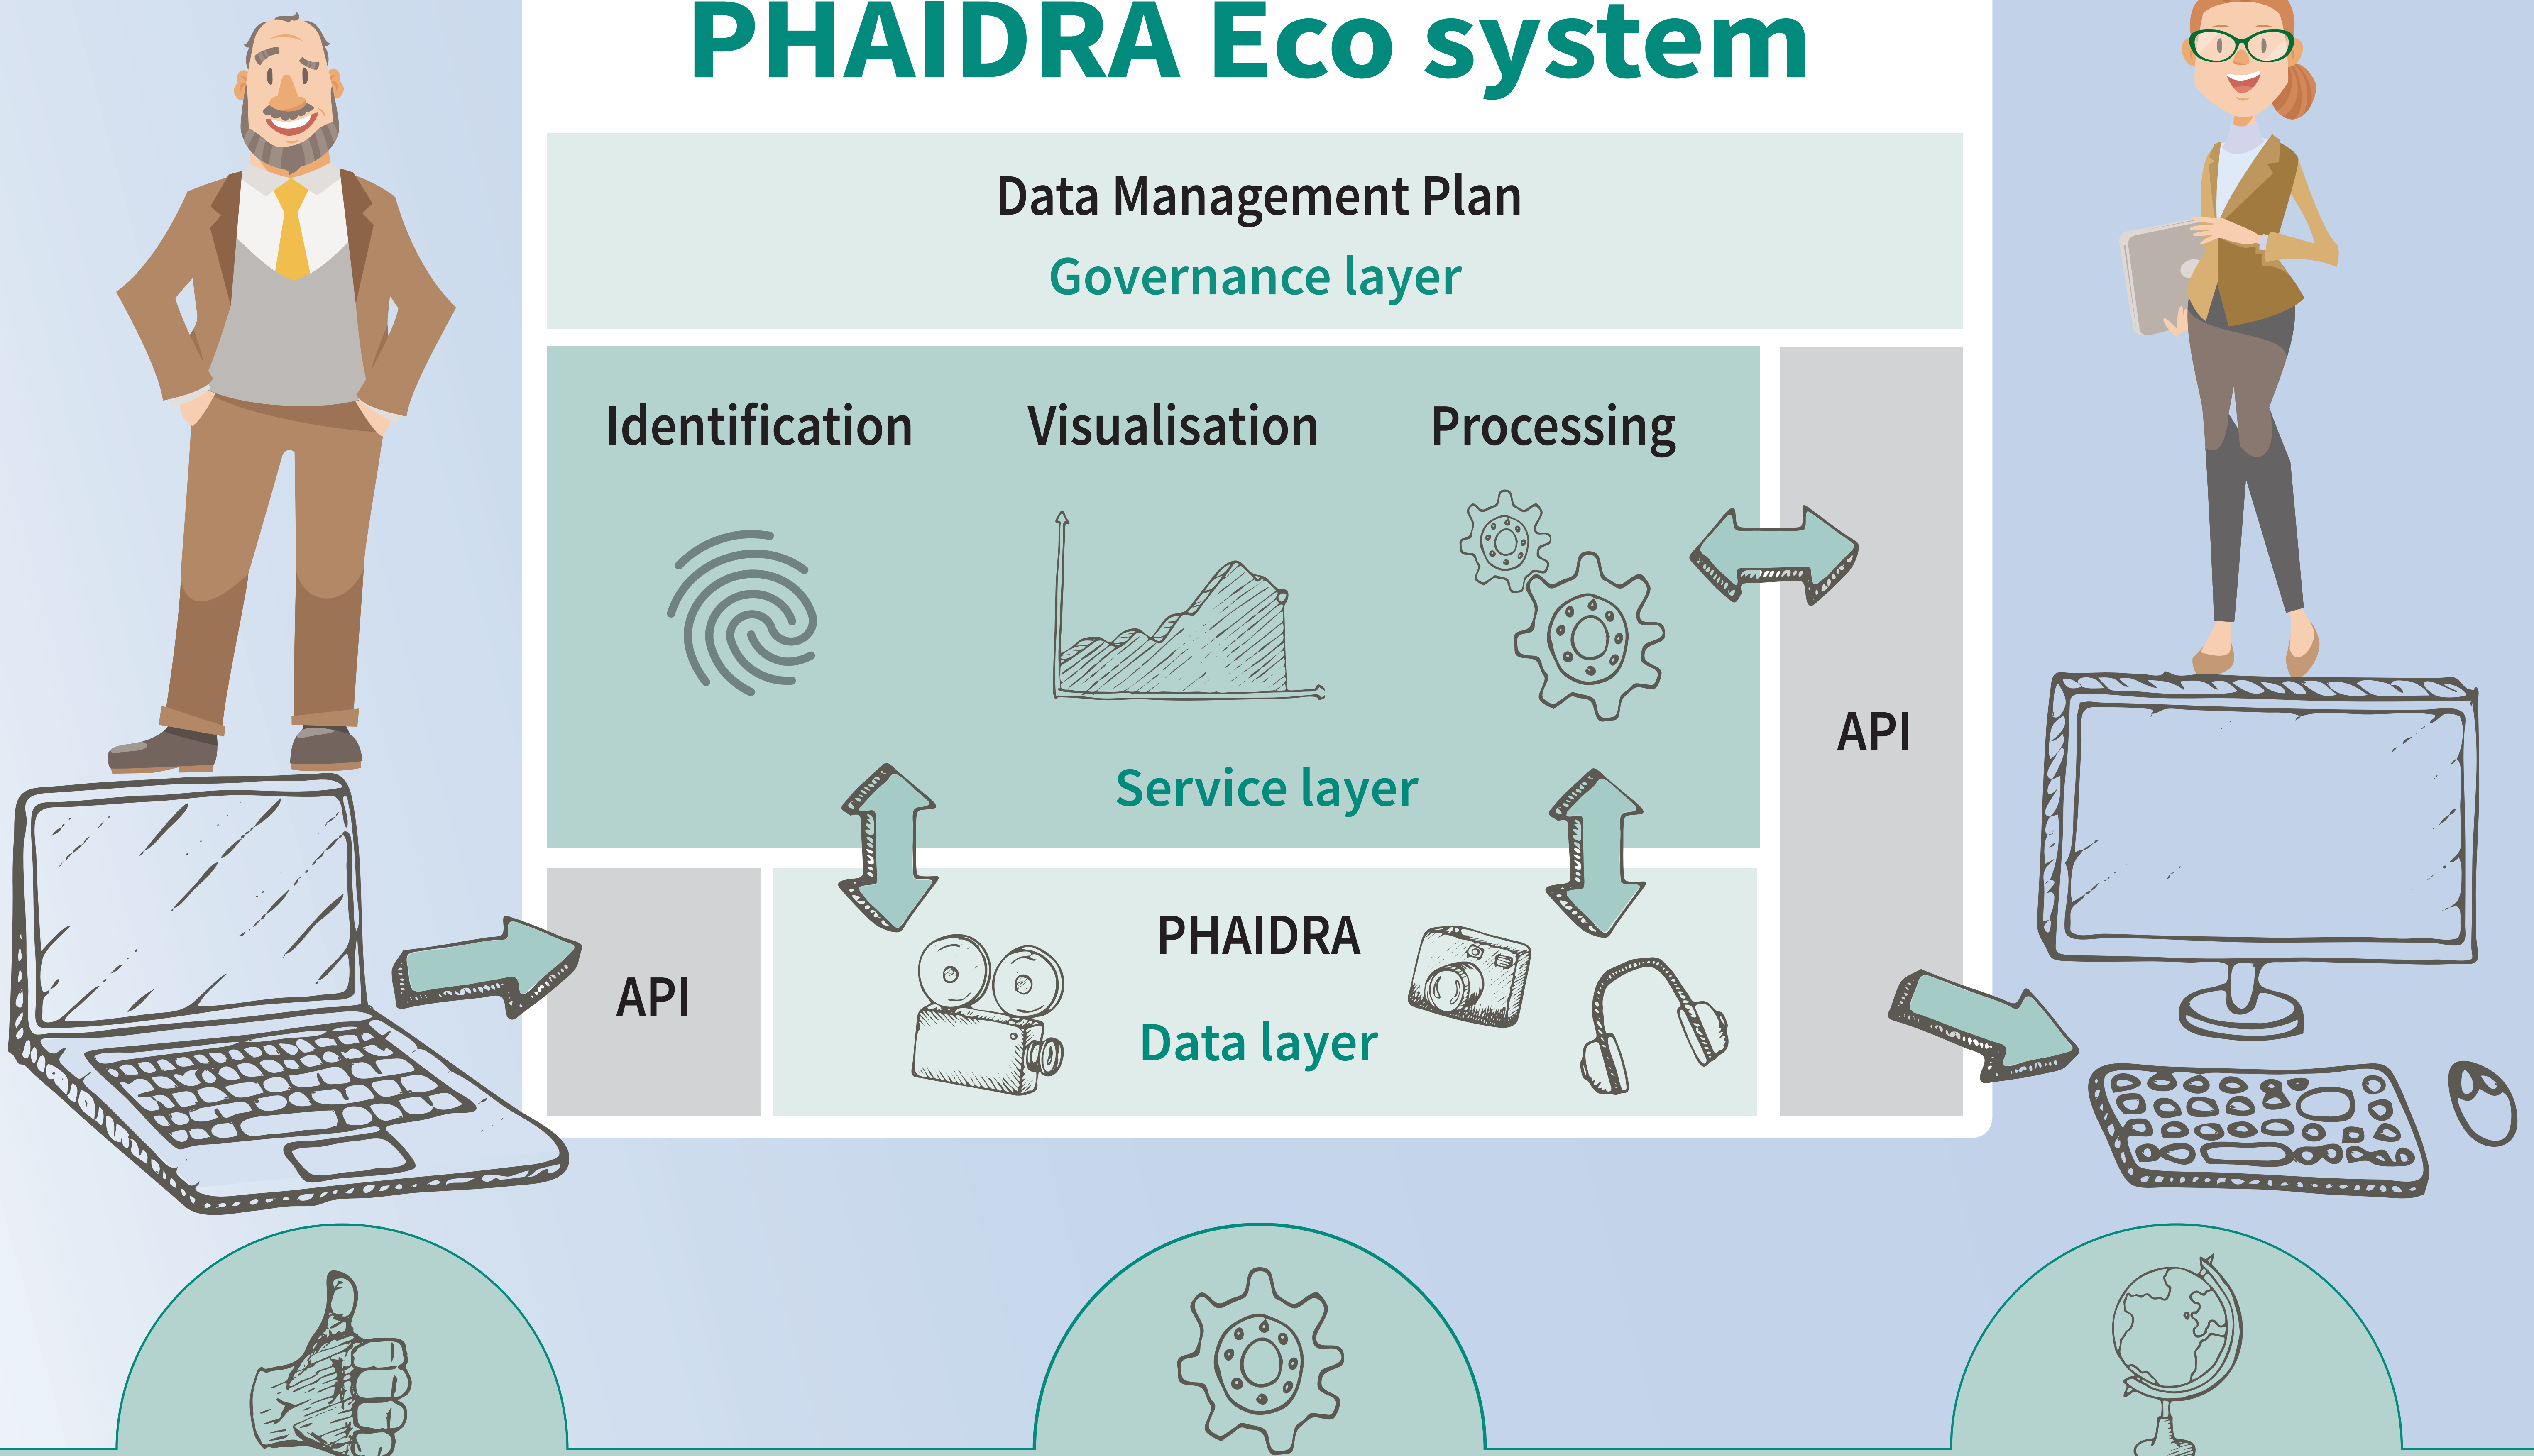

Susanne Blumesberger & Raman Ganguly

### About

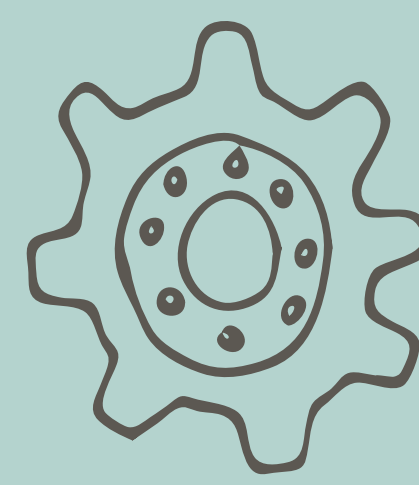

- Phaidra is used to **preserve all kinds of file-based data**
- Data management system is **open to all members** of the University of Vienna
- **Openness to domain-specific requirements** for re-use of the data
- **Researchers can build their own applications on top of PHAIDRA**
- Everyone who records data **keeps full control** of it
- **Machines can access data of the repository**
- Developed and run by the **University of Vienna**

## PHAIDRA Eco system

**Data**  
aligned with  
FAIR Data Principles

**Infrastructure**  
designed with recommendation  
by COAR Next Generation of  
Repositories

**Cooperations**  
with Research Data  
Alliance
